7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Best Practice • Teachers provide a support system to students will be able to meet with either a peer tutor or a peer mentor and students are supported in one-on-one or small group sessions focused specifically on communication. • The improvement in reading and verbal communication skills of the students are asked to watch video lectures available on y-tube, Wikipedia and Google search and write brief description of it in the prescribed format as an assignment. This improves the listening and writing skills of the students. • **Teaching Methods:** During a 60 minutes lecture, 50 minutes are for teaching by the faculty member and 10 minutes are given to student to summarize the contents. This improves the presentation skills, verbal skills and confidence of the students. • **Library hour:** Every week library hour is incorporated in regular time table to instill self-learning habit. The students refer to books/journals and write summary of the contents read. This helps to improve the written communication skills of the students. • Students are subjected to demonstrate written and verbal communication skills during theory, oral and practical examinations by our faculty members. • To trigger young minds towards day to day challenges of the specially abled and elderly people. • In the society has the fundamental right to live independently with dignity. Specially abled and elderly people have to face many challenges related in their day to day life. With the help of modern technology it is possible to find affordable solutions to these challenges. The focus is on mobility and education as it is one of the fundamental requirements of every individual to live with dignity and independently. We expect to create an eco-system that helps to sensitize younger generation towards day to day challenges of the specially abled and elderly people. **The practice:** • Teacher sensitizes the students about the social responsibility towards specially abled and elderly people through social visits. • Teacher motivate students to start with mini project in the final year. The review is taken time to time to observe their progress. **Problem encountered and resource required:** Problem encountered: • As specific components are required, procurement of these components is often very expensive and lengthy process. • It is difficult to give generic solutions due to unique needs of individuals. • Initial investment in such projects is

normally high. Resources required: Laboratory infrastructure, workshop facility.
